

Items NOT ALLOWED as carry-on or checked in luggage

Lithium batteries ALLOWED for handcarry only

Number of Spares Limited to 10 per person

Number of Spares Limited to 2 per person

The terminals of spare batteries must be protected to prevent short circuit by using the original batteries packaging, taping the terminals and putting batteries individually into appropriate plastic bags.

Portable medical/electronic devices - AED, CPAP, Nebulizer, POCiUS FAA Approval, etc. containing lithium metal or lithium cells batteries are acceptable carry-on or checked baggage. Airt approval is required.

Passengers are requested to adhere by the following when carriage of Portable Electronic Devices (PEDs) or batteries is intended.

- Recalled, damaged or defective batteries are prohibited from carriage.
- Large PEDs should be carried in the passenger cabin whenever possible.
- Passengers are requested to ensure that any large PED that cannot be carried in the passenger cabin (e.g. due to its size), and therefore has to be carried in checked baggage, is:
 - Completely switched off and effectively protected from accidental activation
 - The spare battery is never powered down during transport, any applicable, alarm pre-set configuration that may activate it shall be disabled or deactivated.
 - Protected from the risk of accidental damage by applying suitable packaging cushioning or by being placed in a rigid bag protected by adequate cushioning (e.g. clothing).
 - Not carried in the same baggage together with flammable material (e.g. perfumes, aerosols, etc.).
- The carriage of large PEDs in checked baggage is subject to measures effectively mitigating the associated risks.
- When carry-on bags are required to be placed in the hold (e.g. due to the lack of space) that passengers are requested to ensure that any spare batteries or e-cigarettes are to be removed from the bag.

WARNING
Recalled or Damaged batteries are not allowed either as carry-on, checked baggage, or cargo.

Flammable Substances		
Items	Carry-on Baggage	Checked Baggage
Alcoholic beverage in retail packaging, containing 20% to 70% alcohol by volume in aerated or not exceeding 5L, total quantity per person is 5L.	✔*	✔
Non radioactive medicinal or toilet articles (including aerosols) such as hairsprays, perfumes, cosmetics and medicines containing alcohol. The total net quantity of these articles must not exceed 2L or 200g and the net quantity of each single article must not exceed 0.5 kg or 0.5 L.	✔*	✔
Fuels all types of flammable liquids including lighter refills	✘	✘
Flammable paints and thinners	✘	✘
Work tools or equipments with the smell of gas small gas powered engine or chain saws accepted only when trace or smell of fuel is purged/removed. A written or electronic documentation is required stating that a flushing and purging procedure of the engine has been followed.	✘	✔

Other Dangerous Goods		
Items	Carry-on Baggage	Checked Baggage
Carbons dioxide cylinders in quantities not exceeding 2.5 kg per person when used as refrigerant to provide ice packs in the baggage compartments the release of CO2 gas.	✔**	✔
Small non-flammable gas cylinders containing CO2 or other suitable gas, up to two small cylinders fitted into a life jacket and up to two spare cartridges per person, not more than four cylinders up to 50ml water capacity for other devices.	✔	✔
Portable medical/electronic devices AED, Nebulizer, POCiUS, FAA approval, containing lithium metal or lithium ion cell batteries. Airt approval is required.	✔	✔
Weight or air pressure cylinders required for use in-flight. The cylinder must not exceed 5kg gross weight. Airt approval is required. NCRS liquid oxygen systems are forbidden for transport.	✔	✔
E-cigarettes	✔	✘
Battery powered wheelchairs or other similar mobility devices with batteries, non-spillable wet, spillable or lithium.	✘	✔
For removable lithium batteries the battery must be removed from the mobility aid and must be carried in the cabin.	✔	✘
For single battery - battery must not exceed 370 Wh For mobility aids fitted with 2 batteries, each battery must not exceed 160 Wh.	✔	✘
Baggage with installed lithium battery (e.g. Smart Luggage) Non-removable batteries/batteries containing no more than 3 lithium metal or lithium ion must not exceed 27 Wh. Removable batteries/batteries must be removed if baggage is to be checked in damaged battery must be carried in the cabin.	✔	✔
Non-removable Batteries - batteries exceeding 0.5 lithium metal or 27 Wh for lithium ion must not be accepted.	✘	✘

Explosives		
Items	Carry-on Baggage	Checked Baggage
Flares or Fireworks including blasting caps, detonator and fuse, pyrotechnic, dynamite, plastic explosives, torch, etc.	✘	✘

* Subject to local airport security restrictions on carriage of liquids, aerosols and gels (LAG) in cabin baggage

** Carriage of devices checked in with provision to avoid restricted passenger baggage high temperature limits. All battery powered wheelchairs or other mobility devices require the approval of Airt.

** Subject to airline requirements and documentation for handling and packaging.

Passengers are not permitted to carry the following articles into the security restricted area and the critical part of security restricted area:

Guns, firearms and other devices that discharge projectiles

Devices capable, or appearing capable, of being used to cause serious injury by discharging a projectile, including:

- firearms of all types, such as pistols, revolvers, rifles, shotguns;
- toy guns, replicas and imitation firearms capable of being mistaken for real weapons;
- component parts of firearms, excluding telescopic sights;
- compressed air and CO₂ guns, such as pistols, pellet guns, rifles and ball bearing guns;
- signal flare pistols and starter pistols;
- bows, cross bows and arrows;
- harpoon guns and spear guns;
- slingshots and catapults.

Stunning devices

Devices designed specifically to stun or immobilise, including:

- devices for shocking, such as stun guns, tasers and stun batons;
- animal stunners and animal killers;
- disabling and incapacitating chemicals, gases and sprays, such as mace, pepper sprays, capsicum sprays, tear gas, acid sprays and animal repellent sprays.

Objects with a sharp point or sharp edge

Objects with a sharp point or sharp edge capable of being used to cause serious injury, including:

- items designed for chopping, such as axes, hatchets and cleavers;
- ice axes and ice picks;
- razor blades;
- box cutters;
- knives with blades of more than 6 cm; scissors with blades of more than 6 cm as measured from the fulcrum;
- martial arts equipment with a sharp point or sharp edge;
- swords and sabres.

Workmen's tools

Tools capable of being used either to cause serious injury or to threaten the safety of aircraft, including:

- crowbars;
- drills and drill bits, including cordless portable power drills;
- tools with a blade or a shaft of more than 6 cm capable of use as a weapon, such as screwdrivers and chisels;
- saws, including cordless portable power saws;
- blowtorches;
- bolt guns and nail guns.

Blunt instruments

Objects capable of being used to cause serious injury when used to hit, including:

- baseball and softball bats;
- clubs and batons, such as billy clubs, blackjacks and night sticks;
- martial arts equipment.

Explosives and incendiary substances and devices

Explosives and incendiary substances and devices capable, or appearing capable, of being used to cause serious injury or to pose a threat to the safety of aircraft, including:

- ammunition;
- blasting caps;
- detonators and fuses;
- replica or imitation explosive devices;
- mines, grenades and other explosive military stores;
- fireworks and other pyrotechnics;
- smoke-generating canisters and smoke-generating cartridges;
- dynamite, gunpowder and plastic explosives.
